Where are my files

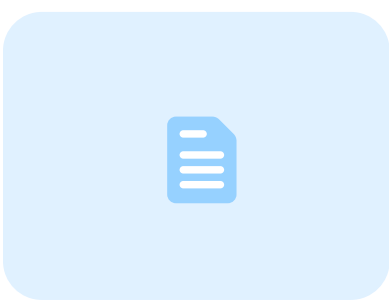

As per the new Google Play Policy changes and requirements, we would like to inform you about modifications to Aloha's File Manager.

From this day forward files downloaded in Aloha Browser are in the scoped storage. It will no longer be accessible in other applications, except for the Aloha Browser File Manager. Also, downloading files to a selected folder is no longer possible, except for the folders in Aloha File Manager.

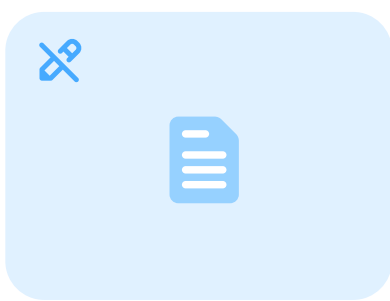

Files already downloaded are still on your device, but depending on former settings, they can now be found in the following:

- **The private folder** remains identical — private files are stored in the folder and accessible only within the Aloha Browser app.
- By default, **the downloads folder** in the settings will remain the same.
- If you had set up your downloads to 'System Downloads folder', the files will be accessible in Aloha's **Device Downloads folder**.
- If you had set up downloads to a custom folder such as 'Music' or 'My Files', these files will be no longer available. However, they will be available in the third-party file managers in the folder it was created.
- If you had set up your downloads to a folder on an **SD card**, the files will be of quick access in Aloha's File Manager.

In regard to the Public folder, according to the new Google Play policy; Files downloaded in Aloha Browser can be viewed, edited, shared, etc. Files downloaded in other applications, but stored in Aloha Browser can only be viewed and copied. To avoid confusion, such files have a 'no editing' icon in the upper left corner.

File downloaded in Aloha Browser app

File downloaded in other applications

User's privacy and security remains one of the most important criteria for us, therefore the **Private Downloads folder** remains safe and functions with no interruptions.
